

# ADS International Conference 2023

The 1<sup>st</sup> International Conference of Asian Dysphagia Society

**New Era of Dysphagia Management in Asia** 2023. 11. 9 (Thu) - 11 (Sat) Suwon Convention Center, Korea

**Presenter:** Professor Georgia A. Malandraki, PhD, CCC-SLP, BCS-S, ASHA Fellow

**Bio:** Georgia A. Malandraki, PhD, CCC-SLP, BCS-S, ASHA Fellow is a Professor of Speech, Language, and Hearing Sciences, and Biomedical Engineering at Purdue University in the United States. She is a Board-Certified Specialist in Swallowing and Swallowing Disorders and is the 2022-2023 President of the Dysphagia Research Society. She is also Editor of the American Journal of Speech Language Pathology. Her research focuses on investigating developmental and treatment swallowing neuroplasticity and developing rehabilitative and telehealth interventions and wearable technologies for patients with dysphagia. She is the developer of the Intensive Dysphagia Rehabilitation Approach (IDRA) and has been involved in the commercialization of novel wearable technologies that aid in the tele-treatment of dysphagia. Clinically, she serves patients with neurogenic dysphagia across the age span and consults clinicians and regulatory bodies on the use of safe and reliable telehealth services. Her work has been funded by several Institutes of the National Institutes of Health of the United States, the American Academy of Cerebral Palsy and Developmental Medicine, private foundations, and through the Purdue Research Foundation. Among others, she has been awarded the prestigious National Institutes of Health NIBIB Trailblazer Award (2019), she has been inducted as a Fellow of the American Speech-Language-Hearing Association (2021), and recently (2022) she was awarded Honors of the Association from the Indiana Speech-Language-Hearing Association.
